SEMI FLEXIBLE CORRUGATED DUCTING

The **CONNECTDEC TYPE COMPACDEC 2** is a 2-layer corrugated semi flexible duct. By the 2-layer construction and type of corrugation the duct can be easily stretched. The duct is fitted with galvanized end caps. According to the need for mounting the end caps can have female/male connection. Standard the end caps and duct are fixated together by an outer ring.

Dimensions and tolerances metal caps according to EN1506:

**Type 1) Male - Male      Type 2) Male - Female      Type 3) Female - Female**

Article code: **CO(1,2, or 3)CD{Ø}/Length** e.g. CO3CD100/1,0 (type 3 Ø100mmx1Mtr)

On customer request the product can be ordered customer specific without outer ring.

Product code **CO3SCD{Ø}/L**

Having no outer ring it limits the operating pressure and max air velocity.

### APPLICATIONS

- **THE Solution to over bridge inaccuracy in measurements.**
- **Saves installation time and material.**
- Female side can be combined with our air valves (e.g., Rondo, DAV or DVSC)
- Suitable for mechanical air supply systems and air conditioning systems
